

# TOUR THE REDWOOD MULTICOHORT EXPERIMENT WITH PASCAL BERRILL PHD

How can we regenerate the right number of redwood sprouts to grow up and replace harvested trees, while simultaneously promoting resistance to destructive wildfires?

Join UC Cooperative Extension at Jackson Demonstration State Forest for a walking tour of the Whiskey Springs Redwood Multicohort Experiment with Cal Poly Humboldt Professor Pascal Berrill and JDSF Foresters to learn from 52 years of experiments asking this question and others.

Please plan to observe COVID best practices, wear a mask if sharing a vehicle, and maintain social distancing.

**Friday, May 27<sup>th</sup>, 10:00 am – 2:00 pm.** Rain or Shine. Bring lunch.

Jackson Demonstration State Forest

(Meeting area TBD.)

Registration is free, but required:
