GRI Launches Campaign to Ban New Fossil Fuel (gas) Stations

featuring
Woody Hastings,
Community Organizer and Leader
in Sonoma County's movement to
ban new gas stations.

***Sunday, October 22, 12 Noon
at the Caspar Community Center***

Come hear why GRI thinks a new fossil fuel station ban in Mendocino County makes sense:

- Avoid possible new toxic chemical leaks and pollution sites;
- Acknowledge that the fossil fuel station business model is ultimately doomed;
- Make a strong statement supporting the transition to emissions-free transportation;
- Encourage the County to take action consistent with its 2019 declaration of a climate emergency;
